EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeff Sadlowski on September 2, 2005.

The application has been amended as follows:

Amend claim 1, line 8, by inserting "non-persistent" after "subsequent".

Amend claim 27, line 7, by inserting "non-persistent" after "second".

2. The following is an examiner's statement of reasons for allowance: The claims are allowable for at least the following reasons: The claims detail a second computer or server performing remote execution of the remote procedure and upon completion of the remote procedure, establish a second or subsequent non-persistent connection to transmit the event trigger and remote procedure results to the first computer system. None of the prior art of record teach using a subsequent or second non-persistent connection in order to send remote procedure results. Prior Art reference WRIGHT (U.S. Patent 5,857,201) at best teach using the same connection in order to send results. The prior art reference does not allude to establishing a second or subsequent

Art Unit: 2195

connection to send the results or that such a function would be successful in the operation of WRIGHT. Newly cited reference, Morshed teaches establishing a subsequent connection after performing a remote procedure call wherein the connection can be any type of connection. Morshed has a filing data of August 22, 2000, but makes reference to a plurality of parent applications. None of its parent applications find support for establishing a connection after performing a remote procedure call in order to send results. Therefore, Morshed's effective filing data is August 22, 200 and does not qualify as prior art. Secondly, Morshed maintains a counter regarding the time of the connections for performance monitoring in determining how long it takes to perform the call. Therefore, in addition to not qualifying as prior art, Morshed teaches away from the invention by monitoring the execution time of the call, thereby must maintaining persistent connections. Therefore, the claims are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
